

Armorize To Present at the Zend PHP Conference

Santa Clara, CA –August 28, 2006 – Armorize Technologies will be attending and presenting at the Zend PHP Conference 2006 to be held at the Double Tree hotel, San Jose, CA from 30/10/2006 to 02/11/2006. The event promises to provide an excellent advantage for Armorize to showcase the recently launched *CodeSecure™*, develop new networks, and analyze the market.

Armorize CEO, Wayne Huang, will be presenting* a paper on *Automated PHP Vulnerability Detection Using Static Analysis*, allowing for a comprehensive explanation of the technology and its benefits, and a live demonstration of Armorize’s premier source code analysis product, *CodeSecure™*.

“Seeing that *CodeSecure™* is the only Source Code Analysis tool that supports PHP we expect to do very well!” – Wayne Huang, CEO, Armorize Technologies.

“PHP has the scalability, robustness, integration and support for web standards to make it a perfect fit for creating and developing modern web applications.”
–Zend PHP Con

In addition, Armorize Technologies will be hosting at the presentation booth* right through the duration of the conference, providing in-depth information, demonstrations, opinions and training regarding Armorize’s source code analysis tool, *CodeSecure™*. Our team will explain the basic need for secure coding practices as well as help you identify which version of *CodeSecure™* is right for your organization.

“At the Zend PHP Conference 2006 you will meet the experts and peers who will share their experience and best practices for creating commercial applications with PHP.” -
Zend PHP Con

*Dates and locations to be announced.

About the Zend PHP Conference

The Zend PHP Conference is the foremost platform for PHP developers and solution providers to interact and share knowledge and experience. The event includes pre-Conference training and certification sessions, hands-on tutorials for PHP developers, and business case studies highlighting PHP-based enterprise solutions from fortune 1000 companies.
